

University of California, Irvine Medical Center

OVERVIEW

SmartWatt entered into a Strategic Sustainability Consulting Contract with the University of California, Irvine to perform an energy audit to identify interior and exterior lighting retrofit opportunities for the campus' medical center. From that initial engagement, a lighting project was developed, which included interior and exterior lighting upgrades with advanced lighting controls. The project was completed in conjunction with the Office of Statewide Health Planning and Development (OSHPD) to ensure compliance with standards and requirements throughout each stage.

THE IMPACT

\$215,286
Annual Savings

1,794,051 kWh
Annual kWh Reduction

The reduction in greenhouse gasses are the equivalent to:

Planting **1,493 acres** of trees

Recycling **55k** trash bags of waste
